

January 30, 2019.

Dear Izar Aximoff and Clarissa Rosa,

Editors of the Special Issue "Survey, ecology and species management in Protected Areas", *Oecologia Australis*

We are glad to submit a revised version of our short communication entitled "A 3-year population study of *Guerlinguetus brasiliensis ingrami* (Rodentia, Sciuridae) at the Serra da Bocaina National Park, Rio de Janeiro state, Brazil" (OA#18731), by Ana Cláudia Delciellos, Priscilla Lóra Zangrandi, Jayme Augusto Prevedello, and Oscar Rocha-Barbosa. We appreciate the review and constructive comments of the two reviewers. We carefully considered and incorporated some suggestions in the manuscript. Our answers to the comments made are detailed in the "Letter to the reviewers". However, we would be happy to undertake any further revisions should these be needed.

Thank you for your consideration. We will be looking forward for your answer.
Yours sincerely,

Ana C. Delciellos
